Machine Vision Applications

Friday, 28 May 2021 15:10 (20)

At the Centre for Accelerator Science (CAS) in ANSTO Lucas Heights, we have recently been evaluating solutions incorporating the use of Machine Vision as a tool for improving our systems and operations.
This talk will provide a brief introduction to Machine Vision and its applications in general industry. We will discuss how Machine Vision has been used previously here at CAS and explore its future potential.
