

ANSTO User Meeting 2021

Contribution ID : 84

Type : Poster

Status, statistics, and recent research highlights from Echidna

Thursday, 25 November 2021 17:32 (1)

The Echidna high-resolution powder diffractometer remains a reliable and productive ACNS instrument contributing annually to about 50 published studies done on a wide range of topics, from magnetic, energy and planetary materials to cultural heritage and additive manufacturing. We will discuss how Echidna has been affected by COVID-19 measures, latest and planned developments, user programme statistics, and recent research highlights.

Level of Expertise

Expert

Presenter Gender

Man

Pronouns

Which facility did you use for your research

Australian Centre for Neutron Scattering

Students Only - Are you interested in AINSE student funding

Do you wish to take part in the Student Poster Slam

Condition of submission

Yes

Primary author(s) : AVDEEV, Max (Australian Nuclear Science and Technology Organisation, Australian Centre for Neutron Scattering); HESTER, James (ANSTO); WANG, Chin-Wei (NSRRC)

Presenter(s) : AVDEEV, Max (Australian Nuclear Science and Technology Organisation, Australian Centre for Neutron Scattering); HESTER, James (ANSTO); WANG, Chin-Wei (NSRRC)

Session Classification : Poster Session

Track Classification : Instruments & Techniques
